

**UNITED STATES DISTRICT COURT
DISTRICT OF COLUMBIA**

JANE DOE, ET AL.,

Plaintiffs,

v.

JAMES R. MCHENRY III, in his
official capacity as Acting Attorney
General of the United States;
WILLIAM LOTHROP, in his official
capacity as Acting Director of the
Federal Bureau of Prisons,

Defendants.

Case No.:

**DECLARATION OF LOREN SCHECHTER, MD, IN SUPPORT OF
PLAINTIFFS' MOTION FOR A TEMPORARY RESTRAINING ORDER
AND PRELIMINARY INJUNCTION**

I, Loren Schechter, MD, hereby declare and state:

1. I have actual knowledge of the matters stated in this declaration and would so testify if called as a witness. I reserve the right to supplement or amend this declaration based on any future information that is provided to me.

2. I am a board certified plastic surgeon. I specialize in performing surgeries to treat gender dysphoria (including chest reconstruction surgeries, genital reconstruction surgeries, and other procedures to feminize or masculinize the body).

3. The information provided regarding my professional background, experiences, publications, and presentations are detailed in my curriculum vitae. A true and correct copy of my CV is attached to this declaration as Exhibit A.

4. I have provided surgical care to patients diagnosed with gender dysphoria for more than 25 years. For the past 8-10 years, I have been performing over 150 gender confirming procedures every year. I have performed over 2000 gender confirming surgeries during my medical career. Currently, approximately 85-90 percent of the patients in my clinical practice are transgender individuals seeking surgeries to treat their gender dysphoria.

5. My opinions contained in this declaration are based on: (1) my clinical experience as a doctor and surgeon treating gender dysphoria and performing surgeries for patients; (2) my knowledge of the peer reviewed research, including my own, regarding medical care for gender dysphoria; (3) my work as a contributing author of the WPATH Standards of Care (SOC); and (4) my work as an author and teacher of surgical techniques used in surgeries to treat gender dysphoria.

6. Gender dysphoria is a highly treatable condition. Without access to medical treatment, many such individuals are unable to function effectively in daily life.

7. [REDACTED]
The medical purpose of vaginoplasty for transgender women is to create genitalia for the patient to allow her to live as a woman and not in her birth sex. The goal of these surgeries is to reduce or alleviate a person's gender dysphoria.

8. Surgeries to treat gender dysphoria have been performed for many decades and are a part of the established medical standard of care which has been endorsed by major medical associations.

9. Vaginoplasty surgery, like many other surgeries, requires post-surgical care. This is an essential part of the healing process and of maintaining post-surgical health.

10. If this necessary aftercare does not take place, serious complications become more

likely. These include vaginal stenosis and a heightened risk of infection. In the most serious cases, those infections could lead to sepsis, which can be life-threatening. For a transgender woman who has this surgery, post-surgical care is also essential to ensure that doctors can perform effective monitoring for prostate health.

I declare under penalty of perjury under the laws of the United States of America that the foregoing is true and correct. Executed January 29, 2025, in Chicago, Illinois.
