11 IN THE UNITED STATES DISTRICT COURT
12 FOR THE EASTERN DISTRICT OF CALIFORNIA
13 SACRAMENTO DIVISION

15 **RALPH COLEMAN, et al.,**

16 Plaintiffs,

17 v.

19 **GAVIN NEWSOM, et al.,**

20 Defendants.

Case No. 2:90-cv-00520 KJM-DB (PC)

**DEFENDANTS’ SUBMISSION OF MAPS
AND DATA IN RESPONSE TO THE
JUNE 10, 2020 ORDER**

22 On May 8, 2020, the Court ordered Defendants to submit by May 15, 2020 maps and other
23 data concerning the housing of *Coleman* class members to reduce the spread of COVID-19 and
24 enhance physical distancing. (ECF No. 6661 at 11-12). Defendants submitted the maps and
25 other documents *in camera* on May 15, 2020. (ECF No. 6706 at 2.) On May 22, 2020, the Court
26 ordered the parties to meet and confer and file by May 27 “a stipulated request concerning the
27 filing of the maps and other documents” describing the California Department of Corrections and
28 Rehabilitation’s mental health programs at various prison facilities, as impacted by the COVID-

1 19 pandemic. (ECF No. 6681 at 1.) The May 22 order also requires Defendants to file updated
2 maps and accompanying information the 15th of every month, starting on June 15 (today). (*Id.* at
3 2.) On June 10, the Court approved and ordered the parties' stipulation concerning the filing of
4 maps and other documents describing the California Department of Corrections and
5 Rehabilitation's mental health programs at various prison facilities, as impacted by the COVID-
6 19 pandemic. (ECF No. 6706.) The stipulation provides that the submitted maps, and any
7 revised version of the maps contemplated by the May 22 order, should be filed under seal. (*Id.*)
8 In addition to the maps, the requested information includes patient census, and level-of-care data
9 and information that does not need to be filed under seal. (ECF No. 6706 at 2.)

10 Attached is a letter enclosing updated maps and other documents describing the California
11 Department of Corrections and Rehabilitation's mental health programs at various prison
12 facilities impacted by the COVID-19 pandemic. Defendants concurrently have filed the
13 referenced maps under seal.

RE: COLEMAN MAPS

Dear Mr. Hrvatin and Ms. Thorn:

On May 8, 2020, the Court ordered Defendants to provide the following in camera by Friday, May 15, 2020 at 9am: 1) “a map showing where Coleman class members are hous[ed] following the defendants’ recent completion of expedited releases ‘to reduce the spread of COVID-19’ and transfers out of prison dormitories undertaken ‘to enhance physical distancing’”; 2) an accompanying list “that identifies by level of care the total number of Coleman class members at each prison facility included on the map”; and 3) “a map identifying the location of every mental health program above the Correctional Clinical Case Management Systems (CCCMS) level of care, accompanied by, for each program, the total number of beds, the number of beds currently occupied, and the number of available bed.” (ECF No. 6661). In response to that order, the California Department of Corrections and Rehabilitation (CDCR) submitted maps and charts to the Court in camera on May 15, 2020.

On May 22, 2020, the Court ordered Defendants to file updated maps and charts on the 15th of every month, beginning on June 15, 2020. To update the maps and charts, the Court ordered the parties to meet with the Special Master in the workgroup to discuss further refinements to the maps, including: “(a) addition of “explanation(s) when the empty bed count plus census of mental health units does not add up to capacity; (b) information identifying how many class members at each institution have been referred, but not transferred to, a different level of mental health care; (c) where each class member is housed who has been referred, but not transferred to, a different level of mental health care; (d) information identifying how many class members at each institution are receiving mental health care in a temporary mental health unit (TMHU), identification of MAX custody TMHUs and non-MAX custody TMHUS, and the census of each TMHU; and (e) addition of location and census information for the Correctional Clinical Case Management System (CCCMS) segregation units.” (ECF No. 6681). The Court also ordered the workgroup to create “an addition to the maps and other documents that shows mental health staffing, including the number of mental health positions required for each institution by

defendants' Staffing Plan, ECF No. 3693, how many of those positions are actually filled, and whether the filled positions are on-site or teleworking." (*Id.*)

On June 6, 2020, the Court issued an order requiring Defendants to "include the location of all TMHUs that remain active or are only temporarily deactivated, and they shall also include for one month past permanent deactivation the location of any TMHU that has been permanently deactivated and, as available, the type of space to which that space has been returned or transitioned." (ECF No. 6707).

The parties and members of the Special Master's team met in a small workgroup on May 28, 2020, June 5, 2020, and June 11, 2020 to discuss the issue above. During the meetings, Defendants provided drafts of the proposed updates to the charts and maps for input from Plaintiffs' counsel and members of the Special Master's team. In the end, Defendants were able to incorporate almost all of the information required by the Court's orders. The maps identify the location of all mental health programs above the CCCMS level of care, the CCCMS segregation units, the location of all TMHUs, and the location of all unused space that has been approved as an alternative housing site by the State Fire Marshal. At this time, no TMHUs have been permanently deactivated, so all locations remain on the maps.

The charts accompanying each map have been modified to include the census of the TMHUs and whether the TMHU is MAX or non-MAX. A new chart has also been added for each institution with a mental health program above the CCCMS level of care. This chart shows the housing location of all patients at the institution that are currently referred to a Mental Health Crisis Bed, an Intermediate Care Facility, or an Acute Psychiatric Program. Thus, only patients who are referred to an inpatient level of care will appear on this chart.

In addition to the charts accompanying each map, CDCR has included a chart that shows the current housing location of patients who are referred to the EOP and CCCMS level of care, but are housed out of level. This chart only shows patients who are currently referred to an outpatient level of care. The methodology for that report is also attached. All information provided in the charts accompanying each map is point in time as of the date and time the information was pulled. Although much of the information was pulled on the same day, the number of patients in the charts may not match as the information may have been pulled at a different time and from a different source.

Finally, a chart was created that shows the staffing information for psychiatrists, psychologists, social workers and the corresponding supervisory classifications at each institution. The chart includes the positions required per the 2009 Staffing Model, the number of positions allocated, and the positions filled by civil service and registry providers. The information in the chart is from April 2020, as this is the most recent validated information that CDCR could provide. In addition to the staffing information, the Court ordered that CDCR include information regarding the number of staff teleworking in the above classifications. However, this information was not previously tracked by CDCR headquarters and the institutions did not have a standardized tracking mechanism in place. Thus, CDCR was concerned regarding the accuracy of any data that may be available. Given these concerns, CDCR was unable to provide telework information in the June 15, 2020 submission. However, Mental Health headquarters is working with the institutions to track telework information by classification for the month of June. This information will be provided to the Court in the July 15, 2020 submission.

We hope the information provided is helpful to the Court.

Respectfully,

/s/ Melissa C. Bentz

CTC	Skilled Nursing Facility	MHCB	Cell	12	9	3

Location of TMHU as of June 9, 2020 and Census Information as of June 5, 2020^{8,9}:

Facility	Building	MAX or Non-MAX	Number of TMHU Beds	Census
A	A 503	Non-MAX	15	0
A	A 504	MAX	6	0

¹ Source: HCPOP H1 Report as of June 9, 2020.

² Source: SOMS Bed Audit as of June 9, 2020.

³ The patients in the beds may not be at the level of care the beds are designated for due to the current transfer restrictions.

⁴ The information provided in this chart may include beds that are currently designated as TMHUs.

⁵ Capacity as provided in this chart is defined as the total number of beds available in each unit. There may be other issues, such as COVID restrictions, physical plant of treatment areas, or resources, which may limit the operational capacity of each building or institution.

⁶ The empty bed count plus the current census may not equal the total capacity as there may be inmates that a single cell status housed in the unit. Therefore, while the cell could hold more than one person, and thus is included in the total capacity, the additional beds cannot be utilized at this time due to the current occupant’s single cell status.

⁷ Facility A, Building 504 houses inmates in the following housing designations: general population administrative segregation unit, EOP administrative segregation hub, and short term restricted housing. Thus, not all inmates in that building are at the EOP level of care. As of June 9, 2020, there were 5 EOP ASU patients.

⁸ Source: TMHU Beds and Roster. This information is reported by each institution and cannot be validated at a headquarters level.

⁹ The TMHU beds at each institution were designated from beds that were already online. As the TMHUs are closed, the beds will revert to their prior use, which could include housing for general population, EOP, or segregation inmates, or specialized beds, such as alternative housing, Correctional Treatment Center, or Outpatient Housing Unit beds.

Patients Referred to MHCb, ICF, or APP Who are Out of Current Mental Health Level of Care^{10, 11}:

⁶ The empty bed count plus the current census may not equal the total capacity as there may be inmates that a single cell status housed in the unit. Therefore, while the cell could hold more than one person, and thus is included in the total capacity, the additional beds cannot be utilized at this time due to the current occupant’s single cell status.

⁷ Facility B, Building 4 houses inmates in the following housing designations: general population administrative segregation unit and EOP administrative segregation hub. Thus, not all inmates in that building are at the EOP level of care. As of June 9, 2020, there were 61 EOP ASU patients.

⁸ Source: TMHU Beds and Roster. This information is reported by each institution and cannot be validated at a headquarters level.

⁹ The TMHU beds at each institution were designated from beds that were already online. As the TMHUs are closed, the beds will revert to their prior use, which could include housing for general population, EOP, or segregation inmates, or specialized beds, such as alternative housing, Correctional Treatment Center, or Outpatient Housing Unit beds.

³ The patients in the beds may not be at the level of care the beds are designated for due to the current transfer restrictions.

⁴ The information provided in this chart may include beds that are currently designated as TMHUs.

⁵ Capacity as provided in this chart is defined as the total number of beds available in each unit. There may be other issues, such as COVID restrictions, physical plant of treatment areas, or resources, which may limit the operational capacity of each building or institution.

⁶ The empty bed count plus the current census may not equal the total capacity as there may be inmates that a single cell status housed in the unit. Therefore, while the cell could hold more than one person, and thus is included in the total capacity, the additional beds cannot be utilized at this time due to the current occupant's single cell status.

⁷ A total of fifty-four EOP patients were transferred from H Unit 1 and H Unit 2 to empty cells in North Block at SQ.

⁸ As of June 9, 2020, there are an additional 62 condemned EOP patient who are housed with the condemned population.

⁹ As of June 10, 2020, there were 3 CCCMS patients housed in this gym.

¹⁰ This unit is a mixed ASU that houses general population inmates and also provides STRH programming for CCCMS RC patients. On June 9, 2020, SQ moved 5 STRH patients out of the Adjustment Center to the other ASU unit due. The Adjustment Center is currently being used to house COVID positive patients.

Request: EOPs not in an EOP bed & CCCMS not in a CCCMS bed

Story: 92557

Requested by: OLA: Weber, Nicholas & Bentz, Melissa

Approved by BAL: Ceballos, Laura on 6/2/2020

Approved by CAPC: emergency request. CAPC reviewed request on 6/8/2020

Methodology:

- Source:
 - MH Datawarehouse Database
 - SOMS
 - EHRS – MH Housing Arrival Order: HPAS value field
 - EHRS – MH Place in Order: MH Level of Care or MH Discharge Patient Order: Discharge To
 - Institution information (non-MHSDS institution & non-EOP institution): MHSDS map available on HQ MH public share drive
 - Subprogram value mismatching with MHI: DAI
- Date range:
 - Current / Date identified on the Data Run Date Time
- Data Reload:
 - A bug was discovered during the data pull. The code value was not mapped correctly in Datawarehouse for DPU: Debrief Processing Unit. Issue fixed and data reload on 6/6/2020 for patient who had been housed in DPU.
- Data Pulled:
 - Date identified on the Data Run Date Time
- Criteria:
 - CCCMS & EOP patients housed in the following dessert institutions
 - CAC
 - CAL
 - CEN
 - CCC
 - CVSP
 - ISP
 - EOP patients housed in the following non-EOP institutions
 - PBSP
 - HDSP
 - FSP
 - SOL

- SCC
- CTF
- PVSP
- ASP
- CCI
- CRC
- EOP patients **not** housed in one of the following EOP Subprogram
 - (ASUHub) ASU Hub
 - (CTC) Correctional Treatment Center
 - (DR) Condemned Housing
 - (EOP) EOP Housing
 - (FV) Family Visiting
 - (GAC) General Acute Care Hospital
 - (HOS) Hospital
 - (HSP) Hospice
 - (NDS) Non Disciplinary Segregation
 - (OHU) Out-Patient Housing Unit
 - (PHU) Protective Housing Unit
 - (PSU) Psychiatric Services Unit
 - (RC) Reception Center
 - (SAP) Substance Abuse Program
 - (SFTY) Safety Cell
 - (VAR) Variable Housing
- CCCMS patients **not** housed in one of the following CCCMS Subprogram
 - (CCCMS) CCCMS Housing
 - (CTC) Correctional Treatment Center
 - (DPU) Debrief Processing Unit
 - (DR) Condemned Housing
 - (FV) Family Visiting
 - (GAC) General Acute Care Hospital
 - (GP) General Population
 - (HOS) Hospital
 - (HSP) Hospice
 - (LRH) Long Term Restricted Housing

- (NDS) Non Disciplinary Segregation
- (OHU) Out-Patient Housing Unit
- (PF) Non-Designated Program Facility
- (PHU) Protective Housing Unit
- (RC) Reception Center
- (RGP) Restricted GP
- (SAP) Substance Abuse Program
- (SFTY) Safety Cell
- (SNY) Sensitive Needs Yard
- (SRH) Short Term Restricted Housing
- (THU) Transitional Housing Unit
- (VAR) Variable Housing
- Limitation:
 - This report may include any data entry errors by end-user input errors
 - The Data run date time column is the date and time the data was run. The column is used for calculating LOS, providing information on the end date/time of LOS. However, the data run date-time is **not** equivalent to the data update date/time. There are a couple of hours lag between the communication between SOMS and the data warehouse database.
 - There are some MHI and Subprogram combinations that are based on outdated Subprogram types. While we continue to research these individual cases, we have included these patients in the count. However, it is our initial assessment that many are correctly placed in the appropriate housing type for their level of care
- Validation
 - Randomly selected data from 6 institutions to conduct positive and negative testing

Terminology/Column definition:

- Institution: current institution where the patient is housed
- Program: current Program assigned by SOMS
- Subprogram: Current subprogram information from EHRS – MH Housing Arrival Order on the HPAS (housing program assignment) value.
- MHI: MH level of care information from either EHRS – MH Place in Order: MH Level of Care or MH Discharge Patient Order: Discharge To
- CDC Number: Patient’s CDCR number
- Name: Patient’s Name
- LOS (Days):
 - For the following two criteria, the difference between the date/time when the patient arrived at the institution or the date/time when the patient MHI changed, whichever comes first, and the data run date time column. Units: Days
 - CCCMS & EOP patients housed in the following dessert institutions

- EOP patients housed in the following non-EOP institutions
 - For the following two criteria, the difference between the date/time when the patient was placed in the subprogram or the date/time when the patient MHI changed, whichever comes first, and the data run date time column. Units: Days
 - Date Run Date Time: The date and time the data was run
