Special Counsel for Defendants

IN THE UNITED STATES DISTRICT COURT
FOR THE EASTERN DISTRICT OF CALIFORNIA
SACRAMENTO DIVISION

RALPH COLEMAN, et al.,

Plaintiffs,

v.

GAVIN NEWSOM, et al.,

Defendants.

Case No. 2:90-CV-00520-KJM-DB

**DEFENDANTS' SUBMISSION OF MAPS
AND DATA IN FURTHER RESPONSE
TO THE JUNE 10, 2020 ORDER**

On May 8, 2020, the Court ordered Defendants to submit by May 15 maps and other data concerning the housing of *Coleman* class members to reduce the spread of COVID-19 and enhance physical distancing. (ECF No. 6661 at 11-12.) Defendants submitted the maps and other documents in camera on May 15. (ECF No. 6706 at 2.) On May 22, the Court ordered the parties to meet and confer and file by May 27 "a stipulated request concerning the filing of the maps and other documents" describing the California Department of Corrections and Rehabilitation's mental health programs at various prison facilities, as impacted by the COVID-

1 19 pandemic. (ECF No. 6681 at 1.) The May 22 order also requires Defendants to file updated
2 maps and accompanying information the 15th of every month, starting on June 15. (*Id.* at 2.) On
3 June 10, the Court approved and ordered the parties' stipulation concerning the filing of maps and
4 other documents describing the California Department of Corrections and Rehabilitation's mental
5 health programs at various prison facilities, as impacted by the COVID-
6 19 pandemic. (ECF No. 6706.) The stipulation provides that the submitted maps, and any
7 revised version of the maps contemplated by the May 22 order, should be filed under seal. (*Id.*)
8 In addition to the maps, the requested information includes patient census, and level-of-care data
9 and information that does not need to be filed under seal. (ECF No. 6706 at 2.)

10 Attached as Exhibit A is a letter from CDCR Office of Legal Affairs enclosing updated
11 maps and other documents describing the California Department of Corrections and
12 Rehabilitation's mental health programs at various prison facilities impacted by the COVID-19
13 pandemic. Defendants concurrently have filed the referenced maps under seal.

RE: COLEMAN MAPS

Dear Mr. Hrvatin and Ms. Thorn:

On May 8, 2020, the Court ordered Defendants to provide the following in camera by Friday, May 15, 2020 at 9:00 a.m.: 1) “a map showing where Coleman class members are hous[ed] following the defendants’ recent completion of expedited releases ‘to reduce the spread of COVID-19’ and transfers out of prison dormitories undertaken ‘to enhance physical distancing’”; 2) an accompanying list “that identifies by level of care the total number of Coleman class members at each prison facility included on the map”; and 3) “a map identifying the location of every mental health program above the Correctional Clinical Case Management Systems (CCCMS) level of care, accompanied by, for each program, the total number of beds, the number of beds currently occupied, and the number of available bed.” (ECF No. 6661). In response to that order, the California Department of Corrections and Rehabilitation (CDCR) submitted maps and charts to the Court in camera on May 15, 2020.

On May 22, 2020, the Court ordered Defendants to file updated maps and charts on the 15th of every month, beginning on June 15, 2020. To update the maps and charts, the Court ordered the parties to meet with the Special Master in the workgroup to discuss further refinements to the maps, including: “(a) addition of “explanation(s) when the empty bed count plus census of mental health units does not add up to capacity; (b) information identifying how many class members at each institution have been referred, but not transferred to, a different level of mental health care; (c) where each class member is housed who has been referred, but not transferred to, a different level of mental health care; (d) information identifying how many class members at each institution are receiving mental health care in a temporary mental health unit (TMHU), identification of MAX custody TMHUs and non-MAX custody TMHUS, and the census of each TMHU; and (e) addition of location and census information for the Correctional Clinical Case Management System (CCCMS) segregation units.” (ECF No. 6681). The Court also ordered the workgroup to create “an addition to the maps and other documents that shows mental health staffing, including the number of mental health positions required for each institution by

defendants' Staffing Plan, ECF No. 3693, how many of those positions are actually filled, and whether the filled positions are on-site or teleworking." (*Id.*)

On June 6, 2020, the Court issued an order requiring Defendants to "include the location of all TMHUs that remain active or are only temporarily deactivated, and they shall also include for one month past permanent deactivation the location of any TMHU that has been permanently deactivated and, as available, the type of space to which that space has been returned or transitioned." (ECF No. 6707).

The maps identify the location of all mental health programs above the CCCMS level of care, the CCCMS segregation units, the location of all TMHUs, and the location of all unused space the State Fire Marshal has approved as an alternative housing site by. At this time, CDCR has not permanently deactivated any TMHUs, although several institutions have moved their TMHU. The locations of the TMHUs on the maps are current as of August 11, 2020. In addition to the above information, the maps also reflect the isolation and quarantine space CDCR set aside in response to the recent *Plata* order. (*Plata v. Newsom*, Case No. 4:01-cv-1351-JST (N.D. Cal), ECF No. 3401).

Before each map, CDCR has provided a cover sheet that includes the name of the institution, whether the institution is a reception center, the custody levels housed at the institution, and the dates that the institution was closed to external movement due to COVID activity. The closure information is as of August 14, 2020. Please note that the Daily Closure Reports, which CDCR uses to track institution closures, were not available in final form until around May 21, 2020. Therefore, some institutions may have been closed to external movement prior to that date.

Following each map is a document with four charts. The first chart provides the Mental Health Services Delivery System (MHSDS) population broken down by level of care for July 9, 2020 and August 11, 2020, to demonstrate the shifts in the population. The second chart provides the location, capacity, and census for the MHSDS programs at the institution that are at Enhanced Outpatient Program (EOP) level of care or above, CCCMS segregation units, and unused space that the State Fire Marshal has approved for use as temporary housing units. The third chart provides the capacity and census of the TMHUs and whether the TMHU is MAX or non-MAX. Finally, the fourth chart shows the current housing location of patients referred to the Mental Health Crisis Bed, an Intermediate Care Facility, or an Acute Psychiatric Program levels of care, but are housed out-of-level. Thus, only patients referred to an inpatient level of care will appear on this chart. The MHSDS population information, TMHU information, and unused space information for institutions with no MHSDS program or with only a CCCMS program is consolidated into one document which follows the maps of the CCCMS only and desert institutions.

In addition to the document with four charts accompanying each map, CDCR has included a document titled "Patients at the CCCMS and EOP Level of Care that are Housed Out of Level as of August 10, 2020." As the title clearly states, that document shows the current housing location of patients referred to the EOP and CCCMS level of care, but are housed out-of-level. To be clear, this document only shows patients who are currently referred to an outpatient level of care. Some institutions are excluded from this document, as there are no CCCMS or EOP patients currently housed out of level at that location. The methodology for that report is also attached.

All information provided in the charts accompanying each map and in the document showing the housing location of CCCMS and EOP patients housed out of level is current as of the date and time it was pulled from the system. As such, the information will be different at a later point in time. Even if the information is from the same day, the number of patients in the charts may not coincide because this data is from different times and a different source.

Finally, a document titled “Staffing Per Institution” is attached to show the staffing information for psychiatrists, psychologists, social workers and the corresponding supervisory classifications at each institution. The chart includes the positions required per the 2009 Staffing Model, the number of positions allocated, and the positions filled by civil service and registry providers. The information in the chart is from June 2020, as this is the most recent validated information that CDCR could provide. In addition to the staffing information, the Court ordered that CDCR include information regarding the number of staff teleworking in the above classifications. As part of the staffing information, CDCR provides telework numbers. The telework numbers represent the number of line staff who are providing direct patient care through telehealth at least fifty percent of the time. It also includes information for supervisory staff who are teleworking at least fifty percent of the time. The institutions track the telework information manually and report the results to Mental Health Headquarters. CDCR cannot validate the telework information due to the manually tracking and reporting by the institutions.

While reviewing the most recent telework information, CDCR discovered that two of the telework numbers submitted last month were incorrect. Therefore, CDCR has submitted the revised telework information for last month with the revisions highlighted.

At the June 26, 2020 status conference, the Court indicated that a trend analysis of the information would be helpful and directed the parties to work with the Special Master on this issue. The Special Master and the parties met on July 2, 2020 to discuss the charts and maps. Defendants cautioned against using the point-in-time information from the charts to create a trend analysis. Instead, Defendants recommended that the Special Master’s expert meet with members of CDCR Mental Health’s Quality Management to discuss how best to provide trend analysis. On July 9, Dr. Potter, the Special Master’s data expert, met with members of CDCR Mental Health and discussed trend analysis. CDCR continues to work on determining what information it can provided to show a trend analysis of patients who are out of their level of care beyond transfer timelines and will continue to work with the Special Master to determine what information would best inform the Court.

We hope the information provided is helpful to the Court.

Respectfully,

/s/ Melissa C. Bentz

Location of TMHU as of August 11, 2020 and Census Information as of August 7, 2020^{9, 10}:

Facility	Building	MAX or Non-MAX	Number of TMHU Beds	Census
A	A 504	MAX and Non-MAX	6	0

¹ Source: HCPOP H1 Report as of July 9, 2020 and as of August 11, 2020.

² Source: SOMS Bed Audit as of August 11, 2020.

³ The patients in the beds may not be at the level of care the beds are designated for due to the current transfer restrictions.

⁴ The information provided in this chart may include beds that are currently designated as TMHUs.

⁵ Capacity as provided in this chart is defined as the total number of beds available in each unit. There may be other issues, such as COVID restrictions, physical plant of treatment areas, or resources, which may limit the operational capacity of each building or institution.

⁶ The empty bed count plus the current census may not equal the total capacity as there may be inmates that a single cell status housed in the unit. Therefore, while the cell could hold more than one person, and thus is included in the total capacity, the additional beds cannot be utilized at this time due to the current occupant's single cell status.

⁷ Facility A, Building 504 houses inmates in the following housing designations: general population administrative segregation unit, EOP administrative segregation hub, and short term restricted housing. Thus, not all inmates in that building are at the EOP level of care. As of August 11, 2020, there were 5 EOP ASU patients.

⁸ This gym has not been activated for use as an alternative housing unit.

⁹ Source: TMHU Beds and Roster. This information is reported by each institution and cannot be validated at a headquarters level.

¹⁰ The TMHU beds at each institution were designated from beds that were already online. As the TMHUs are closed, the beds will revert to their prior use, which could include housing for general population, EOP, or segregation inmates, or specialized beds, such as alternative housing, Correctional Treatment Center, or Outpatient Housing Unit beds.

Patients Referred to MHCB, ICF, or APP Who are Out of Current Mental Health Level of Care^{11, 12}:

⁵ Capacity as provided in this chart is defined as the total number of beds available in each unit. There may be other issues, such as COVID restrictions, physical plant of treatment areas, or resources, which may limit the capacity of each building or institution.

⁶ The empty bed count plus the current census may not equal the total capacity as there may be inmates that a single cell status housed in the unit. Therefore, while the cell could hold more than one person, and thus is included in the total capacity, the additional beds cannot be utilized at this time due to the current occupant's single cell status.

⁷ Source: TMHU Beds and Roster. This information is reported by each institution and cannot be validated at a headquarters level.

⁸ The TMHU beds at each institution were designated from beds that were already online. As the TMHUs are closed, the beds will revert to their prior use, which could include housing for general population, EOP, or segregation inmates, or specialized beds, such as alternative housing, Correctional Treatment Center, or Outpatient Housing Unit beds.

³ The patients in the beds may not be at the level of care the beds are designated for due to the current transfer restrictions.

⁴ The information provided in this chart may include beds that are currently designated as TMHUs.

⁵ Capacity as provided in this chart is defined as the total number of beds available in each unit. There may be other issues, such as COVID restrictions, physical plant of treatment areas, or resources, which may limit the operational capacity of each building or institution.

⁶ The empty bed count plus the current census may not equal the total capacity as there may be inmates that a single cell status housed in the unit. Therefore, while the cell could hold more than one person, and thus is included in the total capacity, the additional beds cannot be utilized at this time due to the current occupant's single cell status.

⁷ Source: TMHU Beds and Roster. This information is reported by each institution and cannot be validated at a headquarters level.

⁸ The TMHU beds at each institution were designated from beds that were already online. As the TMHUs are closed, the beds will revert to their prior use, which could include housing for general population, EOP, or segregation inmates, or specialized beds, such as alternative housing, Correctional Treatment Center, or Outpatient Housing Unit beds.

CCI Closure Dates- June 22, 2020 to Present

Centinela State Prison

Houses Custody Levels I, III, and IV

CEN Closure Dates- June 8, 2020 to Present

California Rehabilitation Center

Houses Custody Levels I and II

CRC Closure Dates- June 11, 2020 to Present

Correctional Training Facility

Houses Custody Levels I, II, and MAX

CTF Closure Dates- August 5, 2020 to Present

Chuckawalla Valley State Prison

Houses Custody Levels I, II, and MAX

CVSP Closure Dates- May 21, 2020¹ to August 5, 2020

¹ The Daily Closure Report was not provided as a final document until May 21, 2020. Therefore, it is possible that the institution closed to movement before this date.

Folsom State Prison

Houses Custody Levels I, II, III, and MAX

FSP Closure Dates- July 28, 2020 to Present

Ironwood State Prison

Houses Custody Levels I, II, and III

ISP Closure Dates- June 10, 2020 to August 5, 2020 and August 7, 2020
to Present

Sierra Conservation Center

Houses Custody Levels I, II, III, and MAX

SCC Closure Dates- August 11, 2020 to August 12, 2020

CCCMS-Only Institutions & Desert Institutions

CCCMS: Avenal State Prison; California Correctional Institution; California Rehabilitation Center; Correctional Training Facility; Deuel Vocational Institution; Folsom State Prison; Sierra Conservation Center

Desert Institutions: California City Correctional Facility; Calipatria State Prison; California Correctional Center; Centinela State Prison; Chuckawalla Valley State Prison; Ironwood State Prison

SCC ⁷	C	Gym	GP	Gym	100	-	-	-

⁴ Capacity as provided in this chart is defined as the total number of beds available in each unit. There may be other issues, such as COVID restrictions, physical plant of treatment areas, or resources, which may limit the operational capacity of each building or institution.

⁵ The empty bed count plus the current census may not equal the total capacity as there may be inmates that a single cell status housed in the unit. Therefore, while the cell could hold more than one person, and thus is included in the total capacity, the additional beds cannot be utilized at this time due to the current occupant's single cell status.

⁶ This area was previously activated to house inmates, but has been deactivated.

⁷ Currently designated for isolation and quarantine space.

CCCMS Segregation Housing Capacity and Census as of August 11, 2020:

Institution	Facility	Building	Level of Care	Housing Type	Capacity ^{4, 5}	Census	Empty Bed Count
DVI ⁸	A	L Wing	ASU	Cell	96	24	71

⁸ This unit is a mixed ASU that houses general population inmates and also provides STRH programming for CCCMS RC patients.

Request: EOPs not in an EOP bed & CCCMS not in a CCCMS bed

Story: 92557

Requested by: OLA: Weber, Nicholas & Bentz, Melissa

Approved by BAL: Ceballos, Laura on 6/2/2020

Approved by CAPC: emergency request. CAPC reviewed request on 6/8/2020

Methodology:

- Source:
 - MH Datawarehouse Database
 - SOMS
 - EHRS – MH Housing Arrival Order: HPAS value field
 - EHRS – MH Place in Order: MH Level of Care or MH Discharge Patient Order: Discharge To
 - Institution information (non-MHSDS institution & non-EOP institution): MHSDS map available on HQ MH public share drive
 - Subprogram value mismatching with MHI: DAI
- Date range:
 - Current / Date identified on the Data Run Date Time
- Data Reload:
 - A bug was discovered during the data pull. The code value was not mapped correctly in Datawarehouse for DPU: Debrief Processing Unit. Issue fixed and data reload on 6/6/2020 for patient who had been housed in DPU.
- Data Pulled:
 - Date identified on the Data Run Date Time
- Criteria:
 - CCCMS & EOP patients housed in the following dessert institutions
 - CAC
 - CAL
 - CEN
 - CCC
 - CVSP
 - ISP
 - EOP patients housed in the following non-EOP institutions
 - PBSP
 - HDSP
 - FSP
 - SOL

- SCC
- CTF
- PVSP
- ASP
- CCI
- CRC
- EOP patients not housed in one of the following EOP Subprogram
 - (ASUHub) ASU Hub
 - (CTC) Correctional Treatment Center
 - (DR) Condemned Housing
 - (EOP) EOP Housing
 - (FV) Family Visiting
 - (GAC) General Acute Care Hospital
 - (HOS) Hospital
 - (HSP) Hospice
 - (NDS) Non Disciplinary Segregation
 - (OHU) Out-Patient Housing Unit
 - (PHU) Protective Housing Unit
 - (PSU) Psychiatric Services Unit
 - (RC) Reception Center
 - (SAP) Substance Abuse Program
 - (SFTY) Safety Cell
 - (VAR) Variable Housing
- CCCMS patients not housed in one of the following CCCMS Subprogram
 - (CCCMS) CCCMS Housing
 - (CTC) Correctional Treatment Center
 - (DPU) Debrief Processing Unit
 - (DR) Condemned Housing
 - (FV) Family Visiting
 - (GAC) General Acute Care Hospital
 - (GP) General Population
 - (HOS) Hospital
 - (HSP) Hospice
 - (LRH) Long Term Restricted Housing

- (NDS) Non Disciplinary Segregation
- (OHU) Out-Patient Housing Unit
- (PF) Non-Designated Program Facility
- (PHU) Protective Housing Unit
- (RC) Reception Center
- (RGP) Restricted GP
- (SAP) Substance Abuse Program
- (SFTY) Safety Cell
- (SNY) Sensitive Needs Yard
- (SRH) Short Term Restricted Housing
- (THU) Transitional Housing Unit
- (VAR) Variable Housing
- Limitation:
 - This report may include any data entry errors by end-user input errors
 - The Data run date time column is the date and time the data was run. The column is used for calculating LOS, providing information on the end date/time of LOS. However, the data run date-time is **not** equivalent to the data update date/time. There are a couple of hours lag between the communication between SOMS and the data warehouse database.
 - There are some MHI and Subprogram combinations that are based on outdated Subprogram types. While we continue to research these individual cases, we have included these patients in the count. However, it is our initial assessment that many are correctly placed in the appropriate housing type for their level of care
- Validation
 - Randomly selected data from 6 institutions to conduct positive and negative testing

Terminology/Column definition:

- Institution: current institution where the patient is housed
- Program: current Program assigned by SOMS
- Subprogram: Current subprogram information from EHRS – MH Housing Arrival Order on the HPAS (housing program assignment) value.
- MHI: MH level of care information from either EHRS – MH Place in Order: MH Level of Care or MH Discharge Patient Order: Discharge To
- CDC Number: Patient's CDCR number
- Name: Patient's Name
- LOS (Days):
 - For the following two criteria, the difference between the date/time when the patient arrived at the institution or the date/time when the patient MHI changed, whichever comes first, and the data run date time column. Units: Days
 - CCCMS & EOP patients housed in the following dessert institutions

- EOP patients housed in the following non-EOP institutions
 - For the following two criteria, the difference between the date/time when the patient was placed in the subprogram or the date/time when the patient MHI changed, whichever comes first, and the data run date time column. Units: Days
- Date Run Date Time: The date and time the data was run
