Case No. 3:20-cv-00406-AJB-DDL

**SUPPLEMENTAL EXPERT
REPORT OF PABLO
STEWART, M.D.**

Judge: Hon. Anthony J. Battaglia
Magistrate: Hon. David D. Leshner

Trial Date: None Set

1 1. I have been asked by Plaintiffs’ counsel to write a supplemental report
2 regarding the current matter before the court concerning the provision of mental
3 health care in the San Diego County Jail (hereinafter, the “Jail”) system. This report
4 is a supplement to my August 19, 2024 expert report (“August 2024 Report”), and
5 my October 31, 2024 expert rebuttal report, Stewart Rebuttal Report (“October 2024
6 Rebuttal Report”) (filed at Dkt. 937-5, 796-5).

7 2. This supplemental report is based on information that was not made
8 available to me at the time that I completed these reports, including information
9 produced in discovery that occurred in this case in 2025.

10 3. For this report, I have reviewed updated mental health and medical care
11 records, from late 2023, 2024, and through February 3, 2025, for incarcerated
12 persons whom I reviewed and discussed in my previous reports. I have also
13 reviewed additional incarcerated persons’ mental health and medical care records
14 from late 2023, 2024, and through February 3, 2025, which I understand were
15 produced by Defendants through discovery that occurred in 2025.

16 4. The materials I reviewed in preparing my opinions and findings are
17 listed in **Exhibit A**.

18 5. The opinions in my previous expert reports remain unchanged, and the
19 findings I provide in this supplemental report serve only to further reinforce those
20 opinions.

21 **I. FINDING #1: THE JAIL’S FAILURES TO ADEQUATELY**
22 **IDENTIFY AND TRACK PATIENTS’ MENTAL HEALTH NEEDS**
23 **PERSIST.**

24 6. In my previous report, I identified multiple systemic deficiencies with
25 respect to the intake screening process, such that the system did not timely,
26 effectively, or adequately identify and meet the mental health needs of incarcerated
27 people when admitted at the Jail. August 2024 Report ¶¶ 24-52. Based on my
28 supplemental review, my opinions as to the systemic deficiencies regarding

1 identification and tracking of people with mental health needs remain the same.
2 These systemic deficiencies continue to place people with mental illness at
3 substantial risk of serious harm. For example:

[REDACTED]

13. This is a patient who requires an individualized plan for meaningful and robust mental health treatment, yet there is no indication of such an individualized plan or that any such treatment is being provided to him.

14. In my previous report, I noted several ways that the system of identifying incarcerated people’s mental health needs was inadequate, including that even the identification of a person’s elevated suicide risk would not lead to clinically indicated treatment planning or meaningful treatment services. These same systemic deficiencies show up in the updated records I received, with [REDACTED] case an illustrative example.

II. FINDING #2: DANGEROUS SYSTEMIC DEFICIENCIES IN THE PROVISION OF ESSENTIAL MEDICATIONS AND PSYCHIATRIC CARE CONTINUE TO PUT PATIENTS AT GREAT RISK OF HARM.

15. In my previous reports, I described my extreme concern about systemic deficiencies in the provision of essential medications to people with mental health

1 treatment needs in the San Diego County Jail. I outlined how the resulting failures
2 and delays in the provision of medications and psychiatric care put patients in this
3 Jail system at substantial risk of serious harm. August 2024 Report ¶¶ 53-95.

4 16. Having now reviewed updated and additional records, the level of my
5 concern remains extreme. My findings and opinions are unchanged. I provide below
6 some illustrative examples of patients who continue to be placed at enormous risk,
7 and who have in fact been harmed by the persistence of these systemic psychiatric
8 care deficiencies.

[REDACTED]

III. FINDING #3: THERE IS STILL NO LEVEL OF CARE SYSTEM, AND THE JAIL SYSTEM CONTINUES TO DENY PEOPLE THE MENTAL HEALTH TREATMENT THAT THEY NEED.

36. In my previous report, I discuss in detail my finding that the San Diego County Jail system lacks an adequate levels of care system and fails to provide minimally adequate treatment to people with mental health needs, causing unnecessary suffering and putting people at substantial risk of harm. August 2024 Report ¶¶ 96-181.

37. Based on my review of updated and additional records, I can discern no indication that the San Diego County Jail system has, since that time, implemented

1 an adequate level of care system or is providing treatment programming that comes
2 close to meeting the needs of the patient population. Instead, I found that patients
3 continue to be denied clinically indicated treatment programming, *including* in units
4 that are ostensibly designated for a “mental health population.” For example:

5 [REDACTED]
6 [REDACTED]
7 [REDACTED]
8 [REDACTED]
9 [REDACTED]
10 [REDACTED]
11 [REDACTED]
12 [REDACTED]
13 [REDACTED]
14 [REDACTED]
15 [REDACTED]
16 [REDACTED]
17 [REDACTED]
18 [REDACTED]
19 [REDACTED]
20 [REDACTED]
21 [REDACTED]
22 [REDACTED]
23 [REDACTED]
24 [REDACTED]
25 [REDACTED]
26 [REDACTED]
27 [REDACTED]
28 [REDACTED]

1 [REDACTED]
2 [REDACTED]
3 [REDACTED]
4 [REDACTED]
5 [REDACTED]
6 [REDACTED]

7 46. In all, this patient did not receive anything close to minimally adequate
8 treatment – not with respect to clinical contacts, nor psychiatric care, nor protection
9 from the well-known risks of decompensation in Administrative Separation. The
10 deficiencies I found in my previous reports show up, in the same substantive ways,
11 in this patient’s records into early 2025.

12 **IV. FINDING #4: THE JAIL’S USE OF SOLITARY CONFINEMENT**
13 **REMAINS EXTREME WITH RESPECT TO HARMFUL**
14 **CONDITIONS AND LACK OF TREATMENT**

15 47. I remain gravely concerned about the Jail’s use of solitary confinement,
16 and the lack of adequate treatment provided to people with mental health needs in
17 such conditions. The current use of solitary confinement in this system puts people
18 at unnecessary and serious risk of harm.

19 48. I have provided extensive discussion about the widely accepted reality
20 that solitary confinement conditions can cause healthy people to develop mental
21 illness and place people with existing mental illness at enormous risk of
22 deterioration, decompensation, and substantial risk of psychosis, self-harm, and
23 suicide. May 2, 2022 Stewart Decl., Dkt. 119-7, ¶¶ 24-33.

24 49. I have also provided my detailed findings about how the San Diego
25 County Jail use of solitary confinement has caused, and continues to cause, serious
26 and unjustified harm on a broad scale. August 2024 Report ¶¶ 182-283. As I have
27 noted, this Jail’s isolation units (called “Administrative Separation”) constitute some
28 of the harshest, most restrictive forms of solitary confinement I have ever witnessed

1 in any jail system.

2 50. Having reviewed additional and updated records of incarcerated people
3 with serious mental health treatment needs who have been held in these solitary
4 confinement units more recently, I see clear evidence in records from late 2023
5 through early 2025 that they continue to suffer and to face substantial risk of serious
6 harm. The systemic deficiencies I have identified remain unremedied. For example:

7 [REDACTED]
8 [REDACTED]
9 [REDACTED]
10 [REDACTED]
11 [REDACTED]
12 [REDACTED]
13 [REDACTED]

[REDACTED]

64. This case illustrates several aspects of the dangerous conditions and lack of adequate care that persist in this Jail system, especially in the Administrative Separation units.

V. FINDING #5: THE GRAVE DEFICIENCIES IN SUICIDE PREVENTION PRACTICES AT THE JAIL PERSIST.

65. Given the long history and considerable public attention of suicides in the San Diego County Jail system, my work in this case has included substantial consideration of the suicide prevention policies and practices in this system. I describe several deficiencies on this topic in my previous findings. August 2024 Report ¶¶ 284-350.

66. While I am relieved to hear that the number of suicides has reportedly decreased more recently, my review of the updated and additional records makes plain that major deficiencies with respect to suicide prevention policies and procedures remain essentially unchanged since the review I conducted for my previous reports. For example:

[REDACTED]

[REDACTED] Based on my experience and expertise, it is my strong opinion that this very serious suicide attempt was preventable with appropriate provision of mental health care and, in particular, the appropriate

1 involvement and intervention of psychiatry (which did not occur).

2 **VI. FINDING #6: UPDATED RECORDS EVIDENCE CONTINUED**
3 **DEFICITS IN STAFFING THAT PREVENT THE PROVISION OF**
4 **CLINICALLY NECESSARY MENTAL HEALTH CARE.**

5 76. In my previous reports, I explained in detail how the San Diego County
6 Jail lacks sufficient mental health staffing resources to meet the treatment needs of
7 the Jail population, and that the Jail's extremely unusual staffing structure is
8 dysfunctional and ineffective in ways that impede necessary systemic improvements
9 to the Jail mental health care system. August 2024 Report ¶¶ 351-388.

10 77. Based on my review of updated and additional records, I can easily
11 discern that these systemic deficiencies have continued. The staffing structure that
12 includes (a) county-employed mental health clinicians (inappropriately supervised
13 and directed by the Sheriff's Office leadership), and (b) private contractor-employed
14 psychologists, psychiatrists, and psychiatric nurse practitioners (who seem to
15 operate independent of county policies and procedures, and with no clear
16 supervision or effective accountability structure), is unchanged.

17 78. The continued lack of adequate staffing is a primary contributor to the
18 (a) untimely provision of mental health treatment (including with respect to
19 psychiatry), (b) the grossly inadequate mental health treatment programming, (c) the
20 lack of an adequate level of care system, and (d) the pervasive failure to provide
21 confidential mental health contacts (with a staggering reliance on non-confidential
22 cell-front contacts). I found each of these systemic deficiencies in my previous
23 reports, and have found them again as part of this updated supplemental review. In
24 short, my opinions as to the systemic deficiencies with respect to staffing as it
25 impacts the Jail mental health care system are unchanged.

26 **VII. FINDING #7: THE JAIL'S DENIAL OF CONFIDENTIALITY IN**
27 **THE PROVISION OF MENTAL HEALTH CARE HAS NOT**
28 **CHANGED, AND STAFF CONTINUE TO MISUNDERSTAND AND**
MISREPRESENT WHETHER CLINICAL CONTACTS ARE
CONFIDENTIAL.

1 79. In my previous reports, I describe in detail how and why confidential
2 mental health contacts are the standard of care, both in the community and in
3 detention settings. The failure to provide confidential treatment in San Diego
4 County Jail puts people at substantial risk of serious harm by hindering their ability
5 to share information and to receive adequate treatment. August 2024 Report ¶¶ 389-
6 401.

7 80. As described in several of the individual patient reviews in this
8 supplemental report, the San Diego County Jail still fails to provide necessary
9 confidentiality in the provision of mental health treatment. The vast, overwhelming
10 majority of mental health encounters are not confidential in this Jail system. This
11 critical systemic deficiency has not been addressed.

12 81. Staff continue to misunderstand confidentiality requirements and, in
13 turn, misrepresent which clinical contacts are confidential. [REDACTED]

14 [REDACTED]

15 [REDACTED]

16 [REDACTED]

17 [REDACTED]

18 [REDACTED]

19 [REDACTED]

20 82. And just as alarming, clinicians still frequently mark the cell-front
21 contact as “confidential,” *even* where they document that *custody staff was present*
22 (Based on my experience, the necessity of custody staff’s presence “for safety” in
23 such a scenario is hard to believe, given that the patient is behind a locked cell
24 door).

25 **VIII. FINDING #8: JAIL CUSTODY STAFF CONTINUE TO EXERT**
26 **IMPROPER AND DANGEROUS CONTROL OVER CLINICAL**
27 **MENTAL HEALTH CARE DECISIONS.**

28 83. In my previous declaration, I identified practices by which San Diego

1 County Jail custody staff improperly control and direct the placement and treatment
2 of people with serious mental health needs, in ways that are inconsistent with the
3 standard of care and that put people at substantial risk of serious harm. May 2, 2022
4 Decl. ¶¶ 17-76; August 2024 Report ¶¶ 403-417.

5 84. Based on my review of the updated and additional records, I can
6 discern *no* changes to critical systemic deficiencies I previously identified relating to
7 custody’s improper control of and interference with the provision of clinically
8 indicated care.

9 85. I have observed no records indicating that mental health staff assess
10 incarcerated people *prior* to their placement in Administrative Separation to identify
11 clinical contraindications with such placement and to prevent any such
12 contraindicated placement. This practice is well-established in the field of detentions
13 and jail mental health care as necessary to prevent foreseeable and serious risk of
14 substantial harm.

15 86. I have observed no records indicating that mental health staff
16 meaningfully assess incarcerated people while they are housed in Administrative
17 Separation to identify signs of decompensation, or that they have been given
18 direction and authority to remove patients who are decompensating or at risk of
19 decompensating. This practice is also well-established in the field of detentions and
20 jail mental health care as necessary to prevent foreseeable and serious risk of
21 substantial harm.

22 87. I have observed no records indicating that the San Diego County Jail
23 system has eliminated the blanket bans on people designated by custody as
24 “Protective Custody” or “Administrative Separation” from the Outpatient Stepdown
25 (OPSD) units, which are currently the only Jail-operated housing locations outside
26 of the acute care Psychiatric Services Units (PSUs) designated to house and serve
27 people with serious mental health needs. This exclusion remains completely
28 unacceptable and puts people at unnecessary risk.

1 **IX. FINDING #9: THERE MUST BE FULL AND MEANINGFUL**
2 **IMPLEMENTATION OF THE COURT-APPROVED REMEDIAL**
3 **PLANS TO ADDRESS THE SYSTEMIC DEFICIENCIES**
4 **PUNISHING OF PEOPLE WITH MENTAL HEALTH NEEDS OR**
5 **AN INTELLECTUAL DISABILITY.**

6 88. In my previous findings, I discuss my concerns with this Jail’s policies
7 and procedures that result in improper and dangerous punishments for people with
8 serious mental illness or intellectual disability. August 2024 Report ¶¶ 418-426.

9 89. I am aware that, since that time, a Joint Motion and Order regarding the
10 Americans with Disabilities Act claim in this case has been submitted and approved
11 by the court. In that document, there are remedial provisions that I perceive as
12 serving to address my concerns on this topic. *See, e.g.*, Dkt. 792-2, ¶¶ 125-129.

13 90. Full and meaningful implementation of those remedial provisions will
14 be absolutely essential to providing a remedy to the systemic deficiencies I
15 identified.

16 **X. FINDING #10: THERE MUST BE FULL AND MEANINGFUL**
17 **IMPLEMENTATION OF THE COURT-APPROVED REMEDIAL**
18 **PLANS TO ADDRESS SYSTEMIC DISCRIMINATION AGAINST**
19 **PEOPLE WITH MENTAL HEALTH AND INTELLECTUAL**
20 **DISABILITIES.**

21 91. In my previous findings, I discuss my concerns with this Jail’s policies
22 and procedures that result in harmful discrimination against people with mental
23 health disabilities or intellectual disabilities. August 2024 Report ¶¶ 427-430.

24 92. Again, I am aware that the Joint Motion and Order regarding the
25 Americans with Disabilities Act claim in this case contains remedial provisions that
26 I perceive as serving to address my concerns on this topic, including the concerning
27 discriminatory practices of (1) failing to place incarcerated people with mental
28 health or intellectual disabilities in the least restrictive setting appropriate to their
individual needs and circumstances; (2) placing such people in more restrictive

1 settings due to their disability and (3) denying such people access to services,
2 programs, and activities that similarly situated, non-disabled individuals receive
3 (e.g., classes, recreation, job opportunities, etc.). See, e.g., Dkt. 792-2, ¶¶ 76-81
4 (“Program Access”).

5 93. Full and meaningful implementation of those remedial provisions will
6 be absolutely essential to providing a remedy to the systemic deficiencies I
7 identified.

8 **XI. FINDING #11: DISCHARGE PLANNING REMAINS A COUNTY-
9 WIDE, SYSTEMIC FAILURE**

10 94. I continue to have significant concern regarding the inadequacy of
11 discharge planning services at the Jail. As I have discussed, this is an essential
12 component of an adequate jail mental health care system. It is absolutely necessary
13 to ensure medication and treatment continuity, linkages to community-based service
14 providers, and resources to prevent people with mental health needs from being
15 subjected to a substantial risk of serious harm upon release. August 2024 Report ¶¶
16 431-439.

17 95. I emphasize here that this is an effort that requires a *multi-agency*
18 solution, including with the County’s Behavioral Health Services Department,
19 Public Health Services Department, Public Defender, and Probation Department.

20 96. Based on my supplemental review, discharge planning services at the
21 San Diego County Jail remain inadequate and will require additional focus and
22 resources in order to achieve a systemic remedy. For example:

23 [REDACTED]
24 [REDACTED]
25 [REDACTED]
26 [REDACTED]
27 [REDACTED]
28 [REDACTED]

1

[REDACTED]

100. This case illustrates persistent systemic deficiencies to provide adequate discharge planning services, and to ensure appropriate *coordination* across county agencies to facilitate continuity of care for people with mental illness upon release. While my review suggests that Jail staff are in some respects working to enhance discharge planning efforts within the Jail, it is clear that more resources and attention, including from other County agencies, are needed to meet the needs of discharging people who have ongoing mental health treatment needs.

CONCLUSION

101. As I have previously noted, in my more than 35 years evaluating and working in detention facilities, I have come across very few, if any, mental health care systems so lacking in effective systems and levels of care to meet the needs of the incarcerated population with serious mental health treatment needs, and to protect people from serious harm.

102. Based on my supplemental review of records through February 3, 2025, the systemic deficiencies I identified in my 2024 reports have persisted. It remains the case that remedial action to address these systemic deficiencies is urgently needed.

1 103. The information and opinions contained in this report are based on
2 evidence, documentation, and/or observations available to me. I reserve the right to
3 modify or expand these opinions should additional information become available to
4 me. The information contained in this report and the accompanying exhibits are a
5 fair and accurate representation of the subject of my anticipated testimony in this
6 case.
